GIZ SHAW

The Sensational Grower!

Again this year GIZ SHAW has proven its ability to out perform and outgrow every other glad in existence today. It is bright orange blending to a yellow throat upon which are a few pepper spots. Florets are round, slightly ruffled and fluted, and wide open. Placement has always been excellent.

For proof of its ability to grow take a look at this picture showing brother Russell, who grows a few glads for fun at Belle Plaine, Iowa, holding the tip of a spike of Giz Shaw. This spike was a little too far open for the Cedar Rapids Glad Show on Saturday and Sunday and this picture was taken on Monday. This spike measured 6 feet, 11 inches tall. Rus took a dozen or so spikes just about as tall to the CR Show where it was 3-spike Division Champion—and was in the running for show champion. We have had several reports from others that grow it for the first time telling of spikes over 6 feet tall.

While not exactly a show flower, it can win on the show table because of its remarkable growing ability. As a commercial its prospects are most promising as stock becomes more plentiful. Propagates good. Makes tremendous bulbs, some 5 to 6 inches in diameter, which seldom split. The stem is excellent and the foliage is a lush green.

LARGE FLOWERED

APPLAUSE (411) (Peggy Farrell X Pactolus) (Midseason) This handsome 1960 introduction is resplendent in a creamy yellow gown with fiery red throat feathers—a striking colour combination.

Excellent grower with tall (50"-52") straight spikes, long (32") flower heads, 21-23 buds and with 8/9 perfectly placed, nicely waved florets open at once. A potential prize winner at the shows and a fine commercial prospect.

ASTORIA (460) (Lavender Beauty X Evangeline) (Midseason) This seedling traces back through both parents to Elizabeth the Queen. It is a fine mauve pink with a smooth, creamy throat—a beautiful and satisfying colour.

The spikes are straight and strong (45"-46"), excellent heads, 20-21 buds, 6-7 open in perfect placement. Lightly frilled. An outstanding florist's glad and a good garden subject.

HILITE (354) (Spic and Span X Sdlg.) (Midseason) A rosy pink edition of Spic and Span, enhanced with a deeper rosier throat, a fine, clear colour. Tall, straight spikes 52"-54" with long flower heads 26"-28". Bud count averages 20 with 8 perfectly placed florets open. An excellent exhibition and florists's variety.

BUTTERFLY TYPES

FIDELITY (300) (Wedgwood X Marionette) (Early) A splendid addition to the butterfly class. Fidelity is pure white with a distinct yellow throat—a beautiful colour.

Ruffled and fluted florets add to its ethereal beauty. Plant habits excellent with straight spikes (40"-42"), 16-18 buds, 6-7 open. Very refined and one you will find extremely useful for arrangements of all kinds.

MY FAIR LADY (334) (Lavender Beauty X Susannah) (Midseason) The glad with the million dollar smile and the most beautiful complexion. Deep salmon pink blending into a creamy throat. An entrancing butterfly.

Straight spikes 46" with 22" flower heads, 18-20 buds, 7 waved florets open in perfect airy placement. George Bernard Shaw would be proud of this edition of My Fair Lady. Tune in and there will be a song in your heart when you see this glad dancing in your garden.

TIARA (340) (Sdlg. X Sdlg.) (Early) A crowning achievement. Its delicate and refined colour is matched by exquisite floret form, beautifully waved like Milady's hairdo after the finest permanent. Blush pink melting into a creamy yellow throat is a prosaic description indeed of this beauty.

Fine spikes 44", with 18-19 buds, 6-7 jaunty florets look you straight in the eye at once.

RUFFLED MINIATURES

MASCOT (234) (Bo-Peep X 47238) (Early) Very attractive ruffled miniature salmon red with greenish yellow throat. Fine plant habits. 35"-36" spikes, 16 buds, 7 open in perfect placement. Very heavy substance. Reliable grower with all spikes identical. Award of Merit, British Gladiolus Society.

STARFLOWER (214) (Bo-Peep X Sdlg.) (Early) A new style, ruffled miniature you will like. It is semi upright facing and is, therefore, extremely useful for arrangements. It's fine, clear yellow colour lends itself to most colour schemes.

Plants 36"-38", nice spikes with 18-19 buds and 6-7 open.

Starflower is the first ruffled semi upright facing glad and could easily start a new trend.

TINSEL (237) (Sdlg. X Sdlg.) (Early) Blazing scarlet with an intense yellow throat, a ruffled miniature counterpart of that favourite of yesteryear—Beacon.

Our field notes consistently state each year—"Excellent colour and form." Spikes 36"-38" long flower heads, 15-16 buds and 7-8 open. Very heavy substance.

All America Gladiolus

LANDMARK (White '60) 510

This shows promise of being perhaps the finest of all the All America glads. A real eye-stopper in a deep cream or light yellow. It grows easily 66" tall with a 30" flowerhead of 22 buds and can open up to 12.

LITTLE PANSY (Miniature) 271

The finest of the miniature winners in the All America trials. A wonderful light blue, with deep pansy like blue throat blotches making it just about the best blue miniature. You'll like it!

JOYOUS (Flad '59) 464

Rich deep rose that is formed in type. Florets are beautifully ruffled and brilliantly colored with the lip petals having a somewhat deeper shade of luscious rose. 8 open.

SPARKLER (Fischer '59) 317

A gay and happy combination of yellow and with bright red lip petals. Florets are ruffled and triangular in shape with each petal lip fluted to give an airy butterfly effect. 8 open.

EMPEROR (Fischer Baerman) 85 days 471

A 1958 addition of the ALL AMERICA GLADS and as they describe it — regal purple trimmed in white — a rich and distinctive color. Five foot spikes, 7 to 8 open round recurved florets — sounds interesting and worthy of more than a casual look.

MAYTIME (Baerman Fischer '57) 70 days 442

Eight to ten open florets of deep pure pink, offset with an attractive white throat. Tall somewhat wiry spikes. An attractive color and an easy grower.

CARIBBEAN (Baerman Fischer '57) 70 days 376

A nice blue-violet floret, a deep rich violet throat and small cream spear create a nice arrangement glad. Sort of a delicate blue color is the overall effect. Holds six to ten open on a medium tall straight spike of nice proportions.

ROYAL STEWART (Pommert '56) 75 days 450

Long tall spikes holding eight or more clear light red florets on a well balanced spike. Color itself is quite nice, but is somewhat reduced in value by the throat marking which could be more attractive.

APPLE BLOSSOM (Baerman Fischer '56) 70 days 460

A corona of cool rose pink, snow white florets, a nice combination of colors. A vigorous grower, medium heavy in substance, with some ruffling. Holds six or more open on a medium to tall spike.

L .75, 10-6.00; M .50, 10-4.00

TIMES SQUARE (570) (Butt '54) (70) A glad that is very similar to King David except in color. Times Square is a blue-purple. Tall with excellent placement.

L 2-40; M 2-30

TOEAN (354) (Dutch Import) (EM) Here is the glad that has stopped more people than probably any other single variety we've grown. A very fine, real deep 300 size black-red. It's really black. Only 16 buds on the average and usually only 5 or 6 open—but even during the hottest or under the driest conditions Toean has always produced fine spikes and has never shown a trace of burning or crooking. Florets are plain and needlepointed.

L 2-30, M 3-30, S 4-30; B 20-25, 100-70

TONTO (486) (Elliott '59) (EM) Smoky old rose with bright red lower petals, pencilled white. Very strong grower about 60" in height and with massive stems that look unbelievably big. Spikes always straight. Opens 7-8 well placed florets out of a total of 24 on 28-30" flower heads.

L only 1.25

TROUBADOUR (466) (Fischer '57) (75 days) A very fine, early rose toned purple of fine habits and growth. There is a small cream throat marking and veins are cream. Tall with 7 to 8 open.

L 2-30, M 3-30, S 4-25; B 25-25, 100-60

VENUS (367) (Salman '55) (80) A very fine 300 size light blue with deeper throat marking. For the most part it does not have a stretchy head but can be quite good and most everyone likes it.

L 2-30, M 3-30, S 4-25; B 25-25, 100-60

VIKING (436) (Fischer '57) (75 days) A fiery scarlet, quite early, with a few vein markings of yellow. Fine, tall grower with up to 8 open making it a very fine addition to the scarlet orange class.

WHITE GODDESS (500) (Roberts '48) (80) A strong, tall growing, ruffled cream white. Quite reliable in the past.

L 2-30, M 3-30, S 4-25; B 25-25, 100-60

WHITE PLUME (500) (Clarke '55) (80) White Plume was our finest and most outstanding white in '59. Tremendous spikes, long flowerheads on strong, sturdy plants. Precision spikes with 8 and 10 open.

L 2-40, M 2.30, S 3-30; B/bts. 15-25

WHISTLE STOP (462) (Woods '53) (80) Ruffled, heavy textured medium rose. Very fine, tall grower with up to 22 buds and 8 open. Excellent placement.

WINDERMERE (441) (Fischer '59) (85 days) Almost a pansy, for Dark Eyes, is a light violet blue with a very prominent large-deep violet blotch. 8 open easily on tall erect spikes in perfect placement. You'll like this one.

L .75; M .50

WILD ROSE (462) (Fischer '55) (80) Glorified Rose Charm. Not quite as early and a little deeper rose with cream throat. May replace Rose Charm eventually.

L 2-30, M 3-30, S 4-25; B 25-25, 100-60

L 2-30; M 3-30; 4-25; Blbts. 25-25, 100-60

BABS (210—E) One of our favorites of the miniatures. Trim heavily ruffled, wide open florets of pleasing light yellow. Not a pale yellow.

L 2-30; M 3-30; 4-25; Blbts. 25-25, 100-60

BABY BLUE EYES (201) (Fischer '59) (85 days) Another pansy type in miniature. Tall, with 8 to 10 open. A nearly white—tinged with violet—floret on which is a bright blue blotch. A real eye catcher.

L 2-30; M 3-30; 4-25; Blbts. 25-25, 100-60

CALYPSO (211) (Butt '58) (E) For those who grow Statuette, here is a new edition and an improvement we think. Slightly larger, about the same rich yellow with just a few-subdued throat feathers that do not detract from its color. 16 to 18 buds, 7 to 8 open on stretchy heads.

L .40; M .30

CANARY (216) (Butt '59) (Early) This fine golden yellow is ruffled and needlepointed and the florets are of very heavy substance. A very pure color indeed, enhanced by a deeper throat. A bit taller than some, 38-40" plants, 20 buds, 8 open. Florets 2½"-3".

L .75

CORVETTE (136) (Butt '57) (70) A slightly ruffled new sensation in the 100 size. Here is a medium scarlet with a darker throat that will open 8 to 9 double rowed florets at one time, instead of the usual 3 or 4 in this size. Wonderful for arrangements.

L .25, M 2-30, S 3-30; Blbts. 15-25

CRADLE SONG (232) (Butt '59) (Early) It is a salmon pink with a yellow dusted throat—a fine blend. 18-20 buds, 36-38" in height, 7 open, 3" in size. Regular placement, good attachment and heavy substance.

L 2-30; M 3-30; 4-25; Blbts. 25-25, 100-60

DAINTINESS (200—E) An exciting, heavily ruffled miniature in a new color that should make it much in demand. Daintiness is a creamy white with cream throat, no hint of any outside color or throat marking. 16 buds, 7 open. A must.

L 2-30; M 3-30; 4-25; Blbts. 25-25, 100-60

EMILY'S BIRTHDAY (233) (Butt '55) (70) The very first to bloom every year for us. But-terfly type. First to bloom are always pleasing and welcome. Apricot-salmon with a yellow throat dusted with scarlet. Reclassified 200 this year, but for us it has been mostly a 300 variety.

L 2-30, M 3-30, S 4-25; B 25-25, 100-60

GOBLIN (242—E) Clear pink with yellow throat; fine color; heavy texture and very ruffled. Grows to medium height; spikes straight; 16-17 buds, 7 open; excellently placed and attached.

L .25, M 2-30; S 3-30

GREMLIN (251—E) Good variety for small bowls and bouquets as the florets face up towards you. Other face up varieties are small and plain petaled and this is the first time we have had a ruffled glad of this type.
L 2-30; M 3-30; 4-25; Blbts. 25-25, 100-60

GREEN THUMB (212) (Butt '56) (E) New queen of the yellow miniatures—buds are actually green, tho when open the color is a greenish yellow. Deeply ruffled of very heavy substance and capable of opening 7 to 10. For the show its a champion sure.
L 2-30, M 3-30, S 4-25; Blbts. Pkg. .25

LEILANI (251) (Kroon '60) (Early) New for 1960. A light rose with a rich creamy white center. Daintily frilled with 6 or more open. Leilani was runner-up in the All-American trials, so you know it has lots of merit.
Any size .50

LIL ABNER (217) (George '56) (65 days) Small yellow florets marked and edged with red and a deep red throat mark makes this an attractive new miniature. Opens 5-6 of its 12 to 15 buds with 4 in color. Popular.
L .25; M 2-30

LITTLE GOLD (212—M) A deep rich golden yellow—the color of a golden yellow California poppy. Slightly ruffled, opens 4-5. The best real yellow miniature.
L 2-30; M 3-30; 4-25; Blbts. 25-25, 100-60

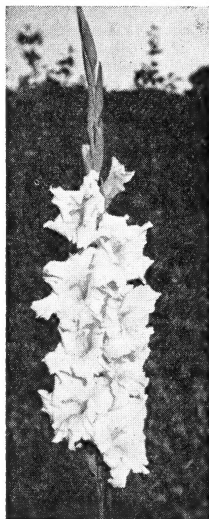

MARILYN'S MINIATURE (216) (Butt '59) (Early) The lightly frilled, green gold florets are exquisite rosebuds, which open out flat with pointed petals. 36" plants, 18 buds, 6-7 open florets, well placed and attached. Spikes all identical like peas in a pod.
L .25

MEDLEY (132) (Butt '58) (E) This light salmon red miniature is only slightly ruffled but is a real 100. Florets are wide open, not at all loaded, and opens 7 and 8. Sure winner in 100 class.
L .40, M .30, S 2-40; Blbts. 10-25

MISS JULIE (207) (Amsler '57) (E) Ruffled pure cream with a bright magneta throat blotch. Good grower with 16 to 18 buds. Will be very popular.
L .30, M .20, S 4-35; B 51-25; 100-\$1.00

NYMPH (222) (Butt '59) (Early) Buff pink blending to a clear, greenish yellow throat succulently and yet ineffectually describes the color. 36-38" spikes, 16 buds, 7 florets open, well placed and attached describes it mechanically. Heavily ruffled and of great substance.
L .75

PELLETIER D'OISY (290—M) The favorite "green" glad. Color is chartreuse with an orange edge and orange stippling over the flower. Will attract plenty of attention and is wonderful for home arrangements. Limited stock.
L 2-30, M 3-30, S 4-25; B 25-25, 100-60

DAINTINESS

The finest new heavily ruffled white miniature. One every miniature fan must have.

PETER PAN (223—E) Deep orange pink with darker throat, a fine self color. Perhaps the most ruffled of all the ruffled heavy textured miniatures originated by Butt. Tall stretchy spikes with 7-8 open.

L .75

SKALAWAG (242-E) A full sister to Bo-Peep. Dark pink with a clear yellow throat. Heavily ruffled. This will be one of the better miniatures and you will surely want to get a start of it.

L 2-.30; M 3-.30; 4-.25; Blbts. 25-.25, 100-.60

STATUETTE (212-E) Yellow with reddish throat feathers. Can top the miniature class at any show as it makes magnificent spikes with up to 9 open, perfectly placed and attached. Not quite as heavily ruffled as some of the others.

L 2-.30; M 3-.30; 4-.25; Blbts. 25-.25, 100-.60

TOYTOWN (236-E) From the first time this bloomed we referred to this as a super Twinkles. Similar in color it is a fine scarlet with an unmarked deep yellow throat.

Grows 34"-36", an ideal height for a miniature with straight spikes. 17-18 buds, 7-8 open, well placed and attached. Very heavily ruffled and leathery texture.

L .25; M 2-.30

TWINKLES (232-E) Probably the most popular miniature today. Heavy textured and ruffled bittersweet orange with a yellow throat feathered scarlet. For startling color it is a knockout.

L 2-.30; M 3-.30; 4-.25; Blbts. 25-.25, 100-.60

ZIG ZAG (251-M) A light red with splashes of gold in the throat of the 3¼ inch florets. Up to 21 buds with 6-7 open on long flower-heads. Very outstanding variety.
